SLG SPRAY GUN

- **General purpose gravity feed conventional spray gun**
- **Set up for the application of all conventional automotive refinish and industrial paints**
- **Lightweight and strong aluminium construction**
- **Smooth fluid flow and pattern shape controls**
- **A 1hp/5cfm compressor is all you need to spray!**

The SLG is a general purpose, conventional spray gun developed to spray a wide range of automotive refinish paints.

The precision engineered brass air cap provides excellent atomisation of most popular, conventional automotive refinish materials with as little as 5 cfm of compressed air, or a 1 hp compressor.

The lightweight and strong gun body has an ergonomically shaped handle for positive grip and comfort with a smooth action trigger and accurate controls for fluid flow and pattern shape.

Fitted with a tough nylon 550ml cup, the SLG spray gun kit also includes a removable paint filter, a cleaning brush and universal spanner for easy cleaning and maintenance.
