

EZMATION™

LOW-COST SINGLE AEROBELL PACKAGE

DESCRIPTION

The EZMation rotary atomizer package is an entry level automation package that provides an opportunity to improve finishing processes with a bell package at an affordable price.

This single bell package was specifically designed for budget conscious customers currently using manual systems or automatic guns but looking for the maximum transfer efficiency, repeatability and consistency only an automated system can deliver.

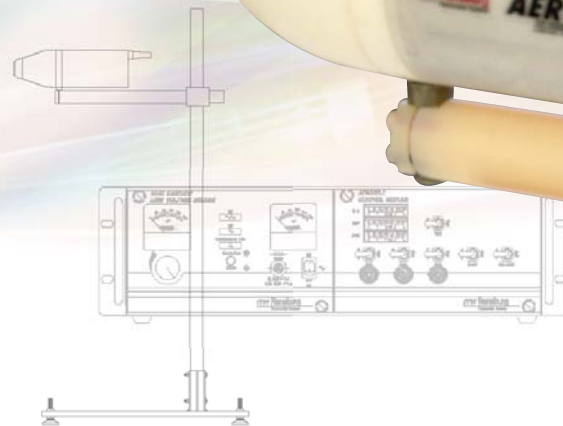

This economical Aerobell package addresses the needs of growing, quality-minded customers on tight budgets. Manufacturers of products such as sporting goods, cosmetic caps, cell phones, brass hardware, oil filters, pens, circuit boards should look carefully at this EZMation package to help improve their finishing operation.

The Single Aerobell Automation Package includes:

- Aerobell 33 (FM Listed) or Standard (RPM) Aerobell
- Air manifold assembly w/filter
- 9040 power supply with cascade
- 9040 Aerobell pneumatic control module
- Mounting package (all associated cables, standoffs, tubing and fittings)

Optional accessories include:

- Stationary stand
- 5-gallon AquaTank (required for waterborne applications)

FEATURES AND BENEFITS

- **“Out-of-the-box” easy set up and installation...** think of this as the “plug and play” of the finishing industry
- **9040 centralized control...**provides the user with focused control in a single location
- **Better atomization...**provides improved coating uniformity
- **High transfer efficiency...**lower costs due to reduced waste and lower emissions for environmental stewardship
- **Softer spray, lower particle velocity...**for better atomization and Class A finish at an affordable price
- **Compact design...**the EZMation single bell package is physically much smaller than a conventional Aerobell system allowing for greater space utilization
