Subject: Enhancement of Vector Corded Low Pressure Barrels

To enhance the performance of the Vector Corded low pressure barrels, an insert has been added in the following barrels:

| |
|---------------------------------|
| 79468-00 (Vector Cascade 85 kV) |
| 79465-85 (Vector Classic 85 kV) |
| 79465-65 (Vector Classic 85 kV) |

With this change, all needle shaft components used in any of the above listed barrels are *backward compatible*. All other attached components will be *compatible* with these enhanced barrels. The current part numbers will not be changed as listed above.

To identify the new barrels, look in the front of the barrel for the tan front nose of the barrel. See figure 1 for an illustration.
