To: ITW Finishing Equipment Americas Distributor Network

Subject: 3695 Brush Assembly #2 Process Handgun

Regular maintenance of the brush assembly of the No.2 Gun is important. Please use proper cleaning technique as described below to avoid damage to the wire assembly.

The brush strokes on both sides of the arm should be in the direction of the arrow shown on the diagram below; in the same direction as the wire. Refrain from cleaning perpendicular to the wires to avoid damage occurring to the brush assembly.

For additional cleaning instructions of the unit, please reference No. 2 Process Handgun Service Manual AH-95-02.3
