

## EMPIRE FENCE STAYS AHEAD OF THE COMPETITION WITH THE RANSBURG NO. 2 GUN

Today, commercial businesses, private communities and single-family homes are taking the necessary precautions to ensure safety. This creates an increased demand for security gate and fencing companies. In an effort to keep up with this increasing demand and stay ahead of the competition, Empire Fence began using the Ransburg No. 2 Process Gun.

Empire Fence, the largest fence manufacturer in Arizona, is a start to finish fencing company, installing a variety of fences that include chain link, ornamental iron, horse corrals, pool fences and automatic security gates. Seldom are two fences the same.

The main focus of their dedicated staff is to consistently deliver high-quality gates and fences at affordable prices. With the superior atomization and 95% transfer efficiency of ITW Ransburg's No. 2, Empire is able to offer a superior finish on each and every fence they install.

***“The bottom line is you can’t beat the No. 2 for paint savings and speed.”***

labor, materials and cleanup. Nearly eliminating overspray, it cuts down on paint waste as well as production time.

“Painting used to be the bottle neck in the factory. Now with the No. 2 Gun we can paint faster than we can cut, weld and wash the part,” said Cutty adding, “It’s also perfect for on-site repairs.”

According to General Manager, Jarod Cutty, “The bottom line is you can’t beat the No. 2 Gun for paint savings and speed.” The transfer efficiency of the No. 2 significantly reduces

Unlike powder coating, liquid does not require as much pretreatment and is much more forgiving for on-site jobs. The No. 2 Gun's high transfer efficiency offers improved productivity, reduced operator fatigue and higher quality finishes. The lightweight design also allows for easy transport.

Empire Fence has installed hundreds of miles of fence. Over the past eight years, the No. 2 has offered Empire an effective and efficient finishing solution with a durability record that will provide for hundreds of more miles. The No. 2 helps Empire Fence stay ahead of today's growing market demands for security and property fences.

*The No. 2 Process Gun is the most efficient indoor or outdoor on-site finishing system on the market today. The unit is very efficient with transfer efficiencies in the 95% range and up. So, with drift and waste virtually eliminated, otherwise impossible on-site refinishing is a breeze. The No. 2 Gun Deuce Unit is an ideal for onsite refinishing package that includes No. 2 Process Gun, Bell, high voltage cable, power supply, fluid hose and cart. Everything is pre-package and ready to go to work for you.*

**About Empire Fence** - Empire Fence, located in Mesa, Arizona, has been in business since 1986 and employs 50 employees with five No. 2 Process Gun Units.
